

IndieFlix

Films sorted into 43 different channels, which cover varying genres and topics.

Layout:

Main pages: Looks like a lot of films to navigate though. Not exactly easy to find a cohesive “list” of all the content available on the website- have to scroll endlessly through “All Films” (accessible through link at the footer of the page). Users need to create an account in order to log-in and access content of IndieFlix. Users can add films they want to watch in their Queue.

Ways available to sort results: Most Viewed, Top Rated, or Recently Added. No way to sort by title. No way to sort by date of film.

Ways to limit results: Genre, Duration, Audience (Family, Teen, or Adult).

Device support: Can add IndieFlix to Roku streaming media device and Xbox, which gives users options to watch content from IndieFlix on a TV screen, rather than on a computer or tablet. No mentioned of compatibility with other devices in the future (i.e. Playstation consoles, or Google Chromecast). Upon browsing IndieFlix website, it doesn’t look like all content is necessarily available on Roku or Xbox, and the only way to determine this is to view the film page and look for the availability tags.

As of 8/14, IndieFlix successfully crowdfunded over \$28,000 on [indiegogo](https://www.indiegogo.com/projects/indieflix) for an iOS app, with plans to add apps for Amazon Fire, Android, and Windows devices in the future.

Film page layout: When viewing a film users can view a variety of information about the film, including film tagline, synopsis, if the film was feature in a festival, cast & crew, and reviews. Additionally, info about the length of the film, it’s audience, it’s country of origin, and it’s genre(s) are also displayed on the film page. Users can also opt to watch a trailer for the film, or the film itself.

Users of IndieFlix can post written reviews about films on this page, in addition to liking (thumbs up), or disliking (thumbs down) films, which affects their overall like/dislike rating. This rating, in addition to duration of film is shown in the thumbnails available throughout the site. Users can link content and comments on the film page to a variety of social media site including Facebook, Twitter, Google+, and Pinterest.

Total number of films reviewed= **27**

14 available elsewhere or **52%**

Genres:

Action/Adventure= **5**

2 available elsewhere= **40%**

Animation= **6**

6 available elsewhere= **100%**

Art House= **5**

1 available elsewhere= **20%**

Arts= **5**

2 available elsewhere= **40%**

Celebrities= **6**

3 available elsewhere= **50%**

Conclusion:

Slightly more than half of reviewed films were available elsewhere, but breakdown by genre shows that some like Art House, Arts, and Action/Adventure are slightly harder to locate elsewhere for free, and that some like Animation and Celebrities can be found more easily. IndieFlix has 43 different channels, and only 5 of these were reviewed. There is some overlap between the content found in each channel, and not every channel represents different genres. For example, there are film festival and staff pick channels.

Selection of All Films *and* Most Viewed

3 available elsewhere= **100%**

Romance= 1

1 available elsewhere= **100%**

Conclusion:

A surprising large percentage of the most viewed films on IndieFlix are available for free viewing elsewhere. The top 36 films listed, ordered by those view the most, were reviewed and searched for on video sites like YouTube and Vimeo. Many films were directly available on Vimeo from the creators of the films themselves. The majority of the top viewed films on IndieFlix are short films, rather than full length features. The site Can I Stream It? (www.canistream.it), was also used to look for information about longer, full length films, as it is able search several popular video streaming sites (paid and free) for film availability. Multiple films often fall into more than one genre, but only the first one listed on IndieFlix was used to label and count each film. Other genres are listed on the chart, but were not counted in the above calculations.

Total w/ only 1 film= 547 (41.5% of total 3 of film festivals)

Total w/ 15 or more films= 37 (2.8% of total # of films festivals)

Conclusion:

There are many film festivals represented on IndieFlix, but a large number of these film festivals only have 1 film. There is a much smaller number of festivals that have a larger number of films. Using a list found online of the Top 10 film festivals, I reviewed a number of films from each to determine if content was available on websites like YouTube and Vimeo for free viewing. Almost half of all the film festival films viewed were available on other sites, but the individual percentages of available by film festival varied

widely. Some of these top 10 film festivals were represented with many films, while others had very few. Many films also are represented multiple times in different film festival categories, so the number of film festivals listed with only 1 film may actually represent multiple films which may account for the large number of film festivals represented overall on IndieFlix.
